

NAME: AMLIPUR SAISHANKAR

ROLL NUMBER: 20MI10005

PROJECT NAME: STUDENT DATA MANAGEMENT

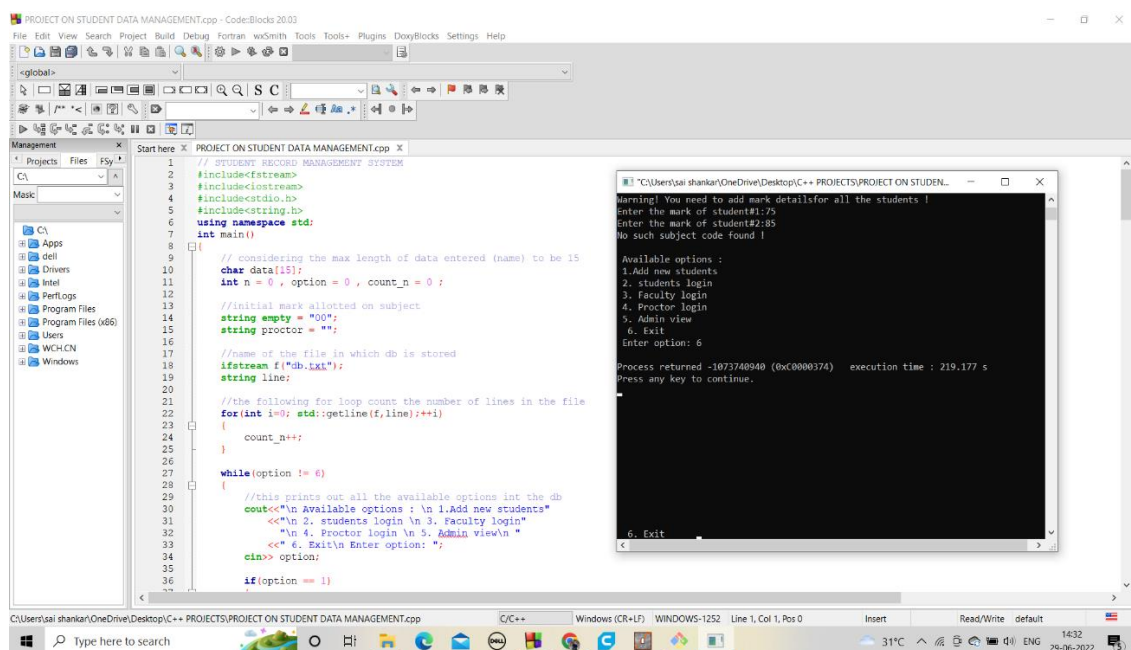

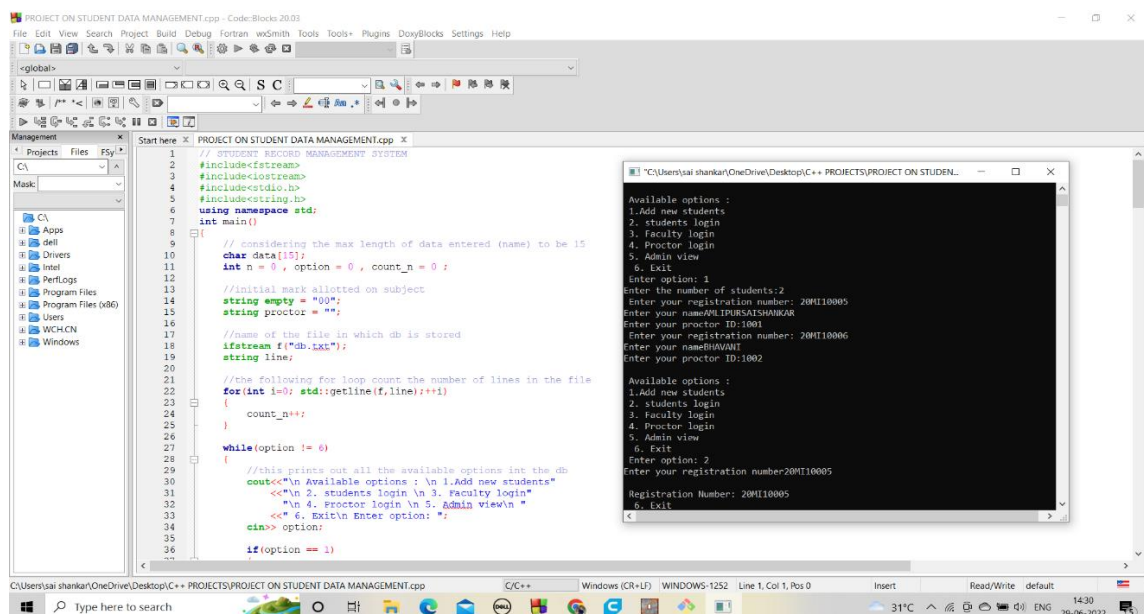

TOOLS USED: Code Blocks for writing the code and for compilation

LANGUAGE USED: C++

Description:

- Developed a code for storing the data of the students securely and safely, using input and output libraries and file management systems of C++ in code blocks.
- In this project, the program collects student details like student name, roll number, marks in each subject, and stores it. To view the data of any student by admin, there is an option called Admin View through which an admin can view the data by entering the Admin password.

Below are some screenshots of the written code:
